More than 700 hams met in Germany for the "Olympic Games" of Amateur radio. The contestants consisted of 63 two-man teams from all over the world, who under the eyes of a referee, competed to be world champion using identical infrastructure from equivalent locations. The sites were supported by over 300 volunteers. In total, there were 262,746 contacts made around the world. World champions LY9A and LY4L achieved 5,139 QSOs. More than half of the teams had over 4,000 contacts within 24 hours. Enthusiastic volunteers and testers looked back on a successful World Championship at the closing ceremony. The WRTC was an unforgettable experience in many ways. Old friendships were reborn and new ones made. See you again in Bologna/Italy in 2022.

TO RADIO:

Confirming the following QSO(s):

DATE	UTC	BAND	MODE	RST
------	-----	------	------	-----
